Versatile drive system for Venlo and Poly greenhouses

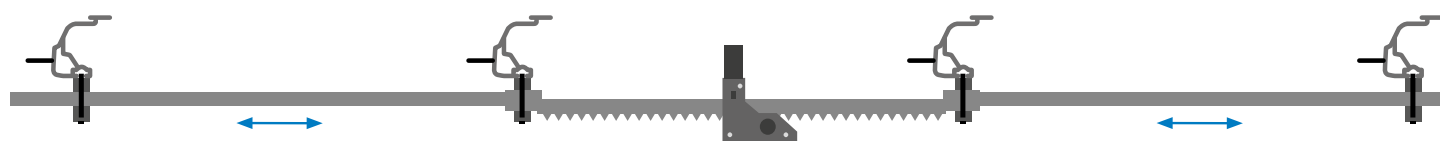

ValkScreenDrive

With three different types to choose from, you will always get the right drive system for your greenhouse!

Three drive types ▼

Type 1 | Push/pull

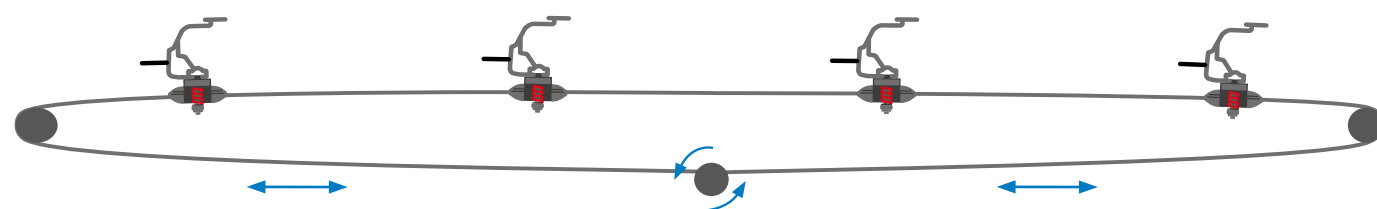

Works using a push/pull tube and rack. The push/pull tube moves back and forth using the rack to open and close the screen cloth.

- ✓ suitable for any type of greenhouse
- ✓ racks required (to be purchased externally)
- ✓ no load on greenhouse gables

Type 1

Type 2 | Pull wire

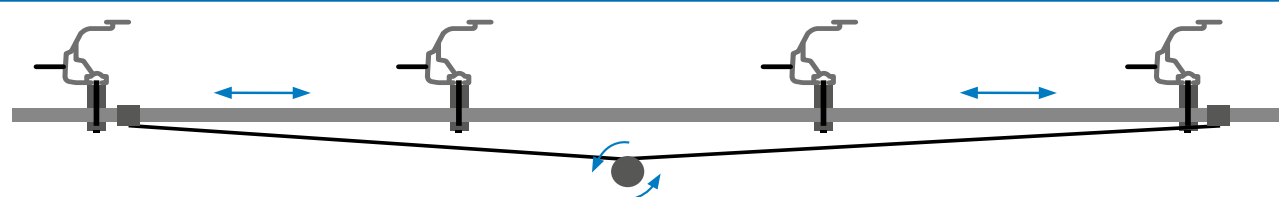

Works using a stainless steel pull wire. This wire is wound around a steel drive shaft. A special tensioner ensures the wire is tensioned correctly for smooth function.

- ✓ more affordable
- ✓ drives larger screen sections
- ✓ greenhouse must be able to withstand this system's forces

Type 2

Type 3 | Semi-push/pull

Works using the push/pull tube and stainless steel pull wire. Combines the benefits of a push/pull system with those of a pull wire system.

- ✓ cost-effective and compatible with any type of greenhouse
- ✓ drives larger screen sections
- ✓ without a rack
- ✓ no load on greenhouse gables

Type 3
